Meeting 10

Date/Time: 11/07/2024, 8:00 pm – 1:45 am
Week: 7
Attendees: Everyone
Note-taker: Tara

Agenda

Item	Discussion
Remaining iteration 2 function progress	At the beginning of the meeting the following functions had not been merged into master. - quizTransfer - quizTrashEmpty - quizQuestionDelete - quizQuestionDuplicate Throughout the meeting, any issues that each member ran into with these functions was discussed as a group and solved together. Thus, all functions had their own merge request created and merged into main
Minor fixes	- As it was discussed in the class forum that the answer colour could be tested a new test was written for both QuizCreateQuestion and QuizQuestionUpdate that tested that the colour of an answer matched one of the strings in the given colour array in swagger. - In other tests, to reduce repeated code, a beforeEach was added - Additionally, slightly incorrect variable names were corrected - More helper functions were created to reduce the repeating code patterns in server.ts - Ensured that all functions/routes that update a time field have a test to check that the updated time fits within a one second range - Created helper function for Date.now() formatting - Added new test to adminQuizCreate to test for timeCreated

Action Items
- Ran dry run for iteration 2 (successful result)
- Tested our backend implementation with the provided front end (it successfully worked with our backend)
