Meeting 7

Date/Time: 27/06/2024, 8:00 pm – 8:45 pm
Week: 5
Attendees: Everyone
Note-taker: Tara

Agenda

Item	Discussion
Discuss which method (from wed lec) of adding sessions to old functions we prefer	Create two helper functions (one to create session id's and one to validate each session id to the existing authUserId) - Error checking helper function (Sarah) - Creating the session id (Himayal)
Data persistence	Create a dataStore.json file Create a helper save function Assigned to Haleemah.
Add questions to quizzes in dataStore.js	Add it when we start writing the functions
Assign new iteration 2 functions: writing HTTP tests, implementation and server	See table below.
Due dates: - Adding persistence - Updating dataStore - Important functions (same three as last time) - Iteration 1 functions - Iteration 2 functions	Persistence: Wednesday Wk 7 (10/07/24) Important functions: end of Monday (01/07/24) Iteration 1 functions: Friday (05/07/24) Iteration 2 functions: Wednesday before due date (10/07/24)
How to deal with multiple response codes (e.g. 400, 401, 403)	Will keep this for later
Create helper functions for (get, put, post, delete)	Put in separate helper file; post, put, get & delete - Condense requests - Copy over code written by Sarah from the lab

Action Items

- Finish important functions by next meeting (Monday 01/07/24).
- Write HTTP style tests. Implement function. Write server.

Name	Functions
Himayal	admin/auth/logout, update quiz question
Sarah	Restore, move a quiz question
Tara	Transfer quiz to another owner, create quiz question
Sameera	Delete quiz question, empty the trash (both delete)
Haleemah	admin/quiz/trash, duplicate a quiz question
